

COMING IN THE NEXT ISSUE

The Art of Engineering: Science can be intriguing in unexpected ways. College of Engineering faculty members will share some of the interesting and unusual images they have captured while conducting research.

Wavy Cracks, by K. Jimmy Hsia

Glass specimens exhibit a variety of crack patterns under thermal gradient loading in these images. A professor in the Department of Theoretical and Applied Mechanics, K. Jimmy Hsia works in the areas of solid mechanics, materials science and engineering, and material behavior and fracture.
